

EVOKE Flow – Portable Digital and Internet-Connected Radio with FM

Brief overview of key features:

- Portable digital and internet-connected radio with FM
- With Flow technology
 - All PURE products with Flow technology use Wi-Fi to connect to the internet wirelessly and access thousands of internet radio stations, podcasts, a library of unique PURE sounds as well as stream music stored on a home computer or network storage device.
 - It will also be possible to connect to the internet via the optional Ethernet dongle accessory which connects via the mini USB port on the back of the radio
- Powered by the PURE Lounge (www.thelounge.com)
 - All PURE digital and internet-connected products use PURE's proprietary internet radio and media portal, the PURE Lounge to access internet radio, podcasts and PURE sounds.
 - Connect EVOKE Flow to the PURE Lounge and save and share favorites between the radio and the Lounge.
- Auto-dimming OLED (Organic LED) display which is crystal-clear from any angle
- Alarm (tone or radio), kitchen timer, sleep timer and 10 station presets
- Touch-sensitive SnoozeHandle™ snoozes the alarm and illuminates the display
- 3.5mm input for iPod/iPhone or PURE's i-10™ dock for iPod (optional accessory)
- Portable – optional ChargePAK™ available as accessory
- Eco-friendly - part of PURE's EcoPlus™ range
- Automatic Wi-Fi software updates or via USB
- Stereo/ headphone out

PURE

Accessories:

- ChargePAK™ E1 battery MSRP: \$59.95
- S-1 Flow™ Auxiliary Speaker MSRP: (pricing not currently available)
- i-10™ Universal iPod dock MSRP: \$59.95
- Reach F10™ remote control (pricing not currently available)
- Ethernet dongle MSRP: \$59.95

Reviewing Tips:

- Connect to Wi-Fi or via optional Ethernet dongle accessory to receive internet stations, podcasts, PURE Sounds and stream music stored on a home computer or network storage device
- Media streaming: Visit the PURE Lounge (www.thelounge.com) and download PURE's Flowserver software to stream your digital music collection on the EVOKE Flow
 - If your music is stored on your computer, the computer needs to be switched on and the Flowserver software open for EVOKE Flow to see the music server
 - If you have a network storage device, your computer does not need to be switched on
- Register the radio with the PURE Lounge using the serial number found on the bar code sticker on the box or the product for enhanced features such as sharing and saving favorites between EVOKE Flow and the PURE Lounge
- Use optional ChargePAK™ to activate screen without plugging into mains for photography (a short charge of the battery may be necessary)
- Full user manual is available on www.thelounge.com

The PURE Lounge

PURE's digital and internet-connected range of radios work together with PURE's proprietary radio and media portal, the PURE Lounge (www.thelounge.com) to enable flow of information between the radio, the portal and the broadcaster. Whilst the radios and the PURE Lounge can function completely independently, when combined they really enhance the user-experience allowing the organization of favorite stations into shared folders and automatically synchronizing content choices on both the radio and the portal.
