PRODUCT DETAILS

StreamR Splash brings you the enjoyment of a Bluetooth speaker in a super portable form factor, with the added benefit of being waterproof for up to 30 minutes at a depth of one metre thanks to its IP67 water and dustproof classification.

Enjoy DAB+ radio, as well as all your favourite music and podcasts – at the beach, camping or even the bathroom. The possibilities are endless. Alexa functionality is provided via the Pure Home app on your phone, allowing you to ask the voice assistant to play music from Amazon Music or Tuneln, answer questions and more – all in a small package that provides sound beyond its size.

Portable, outdoor ready and long lasting

Keep the good times and tunes flowing wherever you go, via Bluetooth or the integrated aux-in cable. Alternatively, enjoy your favourite digital radio shows with best in class DAB+ radio functionality. Set your favourite radio stations to one of the four corner preset buttons to switch up the mood at the press of a button.

StreamR Splash delivers size-defying sound that you can use outdoors, without worrying about splashes from the pool or unexpected rain showers. With 20 hours of battery life, a ruggedized design and a detachable bungee cord that lets users attach the speaker to a backpack, tent and more, StreamR Splash has the power to go as far as your adventures can take it.

One-touch Alexa

StreamR Splash is one of the only portable Bluetooth speakers on the market that offers access to the Alexa voice service. The onboard microphone connects to the Pure Home app on your mobile device via Bluetooth, which connects to Alexa using Wi-Fi or mobile data, bringing the convenience of the virtual assistant with you no matter the location. From weather forecasts, to calendar scheduling and everything in between, enjoy Alexa on the move along with Bluetooth, digital radio and aux-in connectivity.

Pure Home app

Download the easy-to-use and intuitive Pure Home app to connect your StreamR and StreamR Splash to Alexa. You can also customise your speaker settings and access product support, plus you'll be notified of any new software updates.
